

# Women in Politics - Western Hemisphere

Out of the twenty-seven countries mapped, only three were in the top percentage bracket, 39.1-49%, for seats in National Parliament occupied by women. Greater than 70% of the countries mapped had 29% or fewer seats occupied by women. Not one country had at least half, or 50% seats occupied by women, nor did any country have greater than 50% seats occupied by women.
